RESULTS AND EVALUATION:

The winner in each event gets so many points which are equal to number of participants in one of the events with maximum number of shooters.

The 2nd, 3rd and other places' points depend on shooters' quantity in the event.

There will be formula for each event to calculate points for each shooter.

P_x – points for shooter in place X

M – max quantity of shooters in one of the events = points for the 1st place in all events.

N – number of shooters in the concrete event

S – value of step for the concrete event

$S = M/N$ (number of shooters in one of the events' with max quantity of participants divided with number of shooters in concrete event).

Step will be calculated with hundredth (2 numbers after point).

$P_2 = M - S$

$P_3 = M - 2S$

$P_4 = M - 3S$

Value of the step in each event will be different, according to amount of participants in concrete event.

The last place in each event gets 1 point.

National team's result consists of points got from 16 shooters' points irrespective of event and sex

The competition is an individual and the number of participants **is not limited**.

Each nation can start with unlimited shooters in each event, but only 3 shooters, appointed until 07th of May, make points for the team.

After the competitions 16 best results of the competitors will be summed up and according to this the national ranking list will be published. The winner will be awarded with the challenge cup.

Awards:

Victory medals for the 3 best shooters in each event and age category.

The winner country team will be awarded with the competition cup – Baltic Cup.
